UNITED STATES TRADE IN CANNED FRUITS AND VEGETABLES

United States exports of canned fruits and vegetables, in calendar year 1962, were valued at \$105 million and accounted for 26 percent of the value of all U.S. fruit, nut, and vegetable exports.

There has been a striking increase in U.S. fruit, nut, and vegetable exports since the early 1950's, with canned fruits making the largest gain percentagewise and in absolute terms. Canned vegetables showed the second largest percentage gain. Canned fruits and vegetables accounted for only \$34 million, or 17 percent, of the 1950-54 total.

The success of the United States in exporting these products is attributable to a combination of factors: The high quality and competitive prices of U.S. canned goods, coupled with an increasing standard of living and the reduction of import barriers in Europe.
